EDUCATION

University of Houston

Aug 2025

Bachelor of Science in Computer Science with a Minor in Mathematics

EXPERIENCE

Technical Support Analyst

Oct 2025 – Present

Heavy Construction Systems Specialists, LLC

Sugar Land, TX

- Analyzed and resolved complex issues impacting estimating and project management software used globally by construction organizations
- Evaluated client environments and coordinated software implementations, including network drive mapping, server migrations, and system configuration activities.
- Collaborated with internal teams to investigate software behavior, identify root causes, and communicate technical solutions to stakeholders.

Consultation Agent

March 2025 – Oct 2025

Geek Squad (Best Buy Stores, L.P.)

Houston, TX

- Delivered technical support to over 50 clients daily across various consumer electronics including PCs, laptops, tablets and smart home devices.
- Documented and tracked service requests, incidents and resolutions using Geek Squad's ticketing system.
- Received award for earning the highest agent ISP with the most tickets resolved in the 2nd Quarter of 2025.

Undergraduate Research Assistant

Aug 2022 – Jan 2025

University of Houston, School of Technology

Houston, TX

- Provided technical and analytical support for 25–50 faculty members, assisting with research activities, laboratory operations, and student projects.
- Analyzed operational needs and collaborated with faculty and students to support research initiatives and improve laboratory processes.
- Developed documentation, reporting materials, and technical resources to streamline workflows and support academic operations.

IT Support Specialist

June 2021 – Jan 2025

RSI Systems, LLC

Houston, TX

- Coordinated onboarding implementations across 9 departments by planning workstation deployments, configuring network access and setting up new users via Active Directory
- Implemented troubleshooting documentation process and new FAQ page to internal system that reduced repeat support tickets; FAQ page receives ~200 visits per day
- Analyzed existing business processes and collaborated with cross-functional teams to identify workflow improvements, document procedures, and support operational initiatives.
