Summary

Computer Science graduate with 5+ years of technical support experience, leadership experience, and hands-on project exposure with React, Node.js, SQL, JavaScript, Python, and HTML/CSS. While I have not worked as a professional software developer yet, I have built technical projects, learned through coursework, and consistently taken ownership in fast-paced support and teaching environments. I'm looking for an opportunity to grow as a developer, contribute to a team, and keep building the skills needed to produce reliable software

Education

University of Houston

Bachelor of Science in Computer Science with a Minor in Mathematics

Experience

Technical Support Analyst

Oct 2025 – Present

Heavy Construction Systems Specialists, LLC

Sugar Land, TX

- Supported construction, infrastructure, utility, and energy-sector clients through software implementations, project coordination, and operational workflow analysis
- Installed and configured software systems remotely for 75+ customers weekly, with processes consisting of mapping network drives, supporting server migrations, and troubleshooting system errors.
- Created training materials, implementation documentation, and process guidance to improve user adoption and operational efficiency.
- Partnered with estimators, project managers, and operations leaders to troubleshoot complex business and technical challenges.
- Utilized AI tools to assist with documentation, troubleshooting research, and knowledge creation, improving response times and operational efficiency.

Geek Squad Consultation Agent

Mar 2025 – Oct 2025

Best Buy Co., Inc.

Houston, TX

- Delivered technical support to over 50 clients daily across various consumer electronics including PCs, laptops, tablets and smart home devices.
- Earned the highest Individual Service Performance (ISP) among agents and led the team in tickets resolved during Q2 2025.

Undergraduate Research Assistant/Teaching Assistant

Aug 2022 – Jun 2025

University of Houston

Houston, TX

- Analyzed and compared energy production data from engineering and renewable energy research projects using Excel and MATLAB.
- Pioneered the adoption of AI-assisted workflows within the research program, integrating generative AI tools into instructional, research, and curriculum development processes..
- Tutored students in Excel, MATLAB, data analysis, and AI-assisted problem-solving techniques, helping them develop quantitative and technical decision-making skills.

Skills

Programming Languages: Python, SQL, JavaScript, HTML/CSS and R

Data & Analytics: Excel, MATLAB, Data Analysis, Statistical Analysis, Data Visualization

Frameworks & Web Development: React, Node.js

Leadership & Activities

Marketing Lead, University of Houston Non-Music Major Orchestra

Marketing Director, Cougar Computer Science

Python Instructor, DesignYou! Code Camp
